I love create paitings and share to my others with the same passion. These are trailers of my tutorials that I believe will bring some indeept techquies for those who want to improve their skills.

SWORD

"It's quite fast to draw this pic. I wanted to paint a female soldier with fashionable - modern look. Again, I love lighting and want to put new sources of light hit on the character. I drew her twice to test the dark shade on her face. I really like this piece of art, her face pop out pretty well in the picture."

PURPLE

"I drew this one right after Sword; I had the same mood when made this piece of art. However, this time I wanted to draw a male soldier with more realistic look."

BLUE

"I drew this painting base on my portrait. Through it I explored the new method and new technique to paint"
